Areas of Expertise

Agile, Technical Lead, Scrum Lead, Mentoring, Innovation

Java, JavaScript, Python, Go, C, C++

J2EE, Spring Boot, Spring, Hibernate, JSP, Servlets

Multi-threading, Concurrency, Scaling, Fault-tolerance

Node, jQuery, AJAX, React, HTML, CSS

Hadoop, Spark, MongoDB, Cassandra, Redis, Neo4J, Kafka, Memcache

Micro Services, Event Driven Architecture, Distributed Systems, SOA

HTTP, MQTT, TCP, REST, GRPC, SOAP

AWS, Azure, GCP

Docker, Kubernetes

AL, ML, Neural Network, CNN, RNN, LSTM, NLP, Regression, Classification, SVM, MCP

Ant, Maven, Gradle, Git

Data Structures, Algorithms, Design Patterns

UAT, Unit Testing, Automation

OAuth, AuthN, AuthZ

Languages

English

Professional Summary

I am a Technical Lead at PayPal with more than 16 years of experience designing and delivering large-scale distributed systems. I currently lead the cloud transformation and have re-architected more than 15 applications reducing the infrastructure costs by roughly 40%. The program spans scalability, performance and data-migration strategy. My earlier experience includes engineering roles at Amazon, Workday, eBay and other technology companies.

My work centers on distributed web applications and services, and increasingly on AI/ML solutions. I provide architectural direction and technical leadership that carry complex initiatives from planning through delivery.

Professional Experience

Lead Software Engineer, PayPal, San Jose

OCT 2024 — PRESENT

- Lead the cloud migration for the Enterprise Risk and Compliance domain: re-architecting applications for the cloud and reduced infrastructure cost by roughly 40%, spanning scale, performance and data-migration strategy.
- Represent the wider regulatory compliance domain in enterprise-wide cloud and architecture decisions.
- Lead greenfield platforms designed around regulatory compliance requirements.
- Build AI/ML solutions, including AI agents and MCP servers.

Sr Software Engineer Distributed Systems , Canada Workday ULC

DEC 2022 — JUN 2024

- **Performance and Scalability Optimization:** Successfully improved the performance and scalability of BI reports, handling a volume of 130 million reports generated daily.
  Enhanced system efficiency by 20 % through meticulous thread analysis and optimization.
- **Platform Development:** Contributed to the development of a robust platform for a large-scale distributed system, ensuring reliability and scalability.
  Collaborated with cross-functional teams to design and implement key features, enhancing the system's capabilities.
- **Query Optimization and AI:** Worked on query optimization techniques, reducing execution time and improving overall system performance by 40%.

Sr MTS, Aviatrix Systems Canada Inc

MAY 2022 — AUG 2022

- **API Development for Multi-Cloud Solution**: Led the design and development of APIs for a multi-cloud solution, ensuring seamless integration and functionality across cloud environments.
- Directed feature development, coordinating efforts across teams to achieve project milestones.

Software Engineer, Amazon Development Centre Canada ULC

JUL 2020 — APR 2022

- **AWS IoT Greengrass Development:** Designed and Developed components for AWS IoT Greengrass, managing both cloud and device aspects with communication using HTTP and MQTT protocols.
- Led feature development, solving complex IoT business problems, and ensuring project success

Software Engineer 3, eBay Inc

APR 2016 — JUN 2020

- **Checkout and Points with Cobranded Cards for eBay Payments:** Developed and optimized the checkout process and points system, enhancing user experience and efficiency.
- **Integration of Customizable Ads:** Implemented customizable ads, generating direct revenue for the company through targeted advertising.
- **AI and ML for Reducing Checkout Latency:** Leveraged AI and ML techniques to reduce checkout latency by 80%, significantly improving transaction speed.

Sr Software Engineer, Citrix Systems Inc

JUL 2013 — APR 2016

- **XenMobile:** Worked on the web development of Citrix XenMobile Server, enhancing the server's capabilities and performance.
- **Director:** Designed and developed features for 'Director,' an enterprise application used for monitoring and troubleshooting XenDesktop virtual machines, improving system oversight and issue resolution.

Mobile Web Intern, Move, Inc

JUN 2012 — DEC 2012

- Worked developing the first web mobile version of website **m.realtor.com.**
- **Responsibilities:** Development, debugging, basic testing.

Software Engineer, eQ Technologic

JUL 2008 — JUL 2011

- **eQube-BI:** Designed and Developed Admin console and Charts for eQube-BI, a web application that generates multi-dimensional reports using the OLAP cube concept, enhancing data analysis capabilities.
- **Qube-MI:** Built features for Qube-MI, a Business Process Modeling tool used to migrate data from various databases and enterprise applications.

Education

MS Software Engineering, San Jose State University

AUG 2011 — MAY 2013

Bachelor of Computer Engineering, VIIT, Pune. University of Pune

MAY 2004 — MAY 2008
